BRIDGE CLEARANCE
AND
LOAD RESTRICTION MANUAL

MINISTRY OF TRANSPORTATION
Provincial Highways Management Division
Highway Standards Branch
Bridge Office

REVISION INFORMATION SHEET

DATE: September, 2014

NAME OF PUBLICATION: Bridge Clearance and Load Restriction Manual

INSTRUCTIONS: This new edition of the Bridge Clearance and Load Restriction Manual replaces the previous edition dated March, 2013.

The information contained herein has been carefully compiled and is believed to be accurate at date of publication. Freedom from error, however, cannot be guaranteed.

As far as possible, sections of provincial highways transferred to other jurisdictions have been identified in the manual. However, this data should not be used to locate the boundaries of these jurisdictions or to identify ownership of a highway section transferred.

For up-to-date information, users of this manual are advised to contact:

Carrier Sanctions and Enforcement Branch
Ministry of Transportation
301 St. Paul Street, 3rd Floor
St. Catharines, ON L2R 7R4

W.B. or (WB)	Westbound

DEFINITIONS

Header for Highways

HWY.	DIRECTION

DIRECTION OF HIGHWAY

The direction of a highway is indicated by a single alphabetic character. It can only be N (North), S (South), E (East), or W (West). It is determined by the direction in which the distances are measured.

DISTANCE

The distance in kilometres measured from the beginning of the highway.

IDENTIFICATION

A brief description of a landmark or structure. Culverts, tunnels, and Bailey bridges are identified in this column.

G. NO.

This is the grade separation type number when 2 highways intersect. All common types of grade separations are numbered from 1 to 17. Uncommon or complicated multi-level interchanges are shown on separate detail sheets at the end of the manual.

CODE

The codes are 'O' and 'U'.

O	Indicates that the subject highway is on a bridge or goes over a culvert or tunnel
U	Indicates that the subject highway goes under a bridge or through a tunnel.

DIRECTION OF LANE

The directions of the lanes parallel the direction of the highway. Northbound and Southbound lanes are shown as N and S, Eastbound and Westbound lanes are shown as E and W.

ROADWAY

Roadways physically separated from each other are labelled CR (core) CL (collector) SV (service road) and RA (ramp).

DEFINITIONS continued

HORIZONTAL CLEARANCE

The horizontal clearance is measured at right angles to the centre line of the travelled portion of the highway. It is the minimum clear distance between the faces of obstructions such as median barriers, abutments, piers, handrails and light poles ignoring curbs and medians, which are less that 0.3 m above the roadway surface.

Only clearances less than 8.0 metres are shown. A blank entry means that the clearance is equal to or greater than 8.0 metres.

LANE

Lanes in the same roadway and having the same direction are numbered 1 to 9 starting from the lane farthest from the highway centre line except that acceleration lanes are labelled 'A' and deceleration lanes are labelled 'D'. Where a lane serves as both then 'A' is shown.

VERTICAL CLEARANCE

Vertical clearances equal to or greater than 9.9 m are indicated as 9.9 m.

Header for Interchanges

I	LOCATION

Every interchange is given an I number and a location. Structure numbers are shown circled in the I diagrams.

G. NO.

This column is left blank in the text referring to the I diagrams. Other columns from 'CODE' onwards are the same as highways.

The following escort requirements apply to section of Hwy 144 from distance 20.0 km at Whitson creek (Chelmsford) to distance 271.0 at Jct. Highway 101.

Loads in excess of 3.70 metres must originate or be destined along Hwy 144.

When width of load ranges from 3.66 metres to 3.99 metres, two private escort vehicles are required. When width of load ranges from 4.00 metres to 4.56 metres, an OPP escort at the front of the load and a private escort vehicle at the rear of the load are required. When width of load is 4.57 metres and greater, two OPP officers, one at the front and one at the rear of the load are required.
